

Fatih Erkam Corumluoglu

📍 Kiel, GERMANY 24118 ✉ fenererkam@gmail.com ☎ +49 1573 9659088 in fatihcorumluoglu

Profile

Ambitious **Junior Penetration Tester** with eJPT certification and an academic background in Electrical Engineering. Specialized in offensive security with practical experience in network enumeration, vulnerability exploitation, and privilege escalation. Ranked in the **Top 1% on TryHackMe**. Proficient in Metasploit, Burp Suite, and Python for ethical hacking operations. Combines analytical engineering precision with a passion for identifying and mitigating critical security flaws.

Certifications (Extract)

- **eJPT** (eLearnSecurity Junior Penetration Tester)
- **TryHackMe: Top 1% Global** (Focus: Junior Penetration Tester)
- **CompTIA Security+**
- **ISO 27001:2022 Lead Auditor** (Exam Certificate)
- ISC2 Certified in Cybersecurity
- IBM Cybersecurity Analyst Professional

Professional Experience & Further Education

Intensive Specialization: Offensive Security & Penetration Testing | TechPro Education

Remote
May 2023 – Dec 2023

- **Over 1,000 hours of practical experience** in lab environments, CTFs, and bug bounty programs.
- Execution of comprehensive penetration testing campaigns from reconnaissance to post-exploitation according to the Cyber Kill Chain.
- Network discovery and service enumeration using **Nmap** and NSE to identify attack surfaces.
- Exploitation of **OWASP Top 10** vulnerabilities (SQLi, XSS, IDOR/BOLA) using **Burp Suite**.
- System compromise using **Metasploit** and creation of custom reverse shell payloads with **Msfvenom**.
- Execution of credential attacks (SSH, FTP, RDP) with **Hydra** as well as password cracking with **Hashcat** and John the Ripper.
- Enumeration of **Active Directory** environments using SMBMap and Enum4Linux for lateral movement.
- Documentation of exploitation steps and creation of professional remediation reports.

Outlier AI | Technical Quality Assurance (Technical QA)

Remote
Oct 2024 – Apr 2025

- Validation of technical AI models through Reinforcement Learning (RLHF) with a focus on logical consistency and technical precision.
- Ensuring data integrity and compliance with complex guidelines.

Education

M.Sc. Christian-Albrechts-Universität zu Kiel, Electrical Engineering and Information Technology
Incl. 4 COVID-19-related "free semesters". Currently pivoting toward practical cybersecurity due to the high theoretical content in the current curriculum.

Sept 2021 – Present

B.Sc. Karabuk University, Electrical and Electronics Engineering (Recognized Degree)
Grade Point Average: Good (2.2)
Thesis: Image processing-based automation system for object separation.

Sept 2014 – May 2019

Skills

Offensive Security: Metasploit, Burp Suite, Nmap, Hydra, Hashcat, John the Ripper, SMBMap, CrackMapExec, Enum4Linux, WPScan, Searchsploit, Msfvenom.

Networking & Tools: TCP/IP, Linux/Unix CLI, Bash & Python Scripting, Wireshark, SQL.

Compliance: ISO 27001 Framework

Languages: Turkish (Native), English (C1 - IELTS 7.0), German (B2).
