

Fatih Erkam Corumluoglu

📍 Kiel, Germany 24113 ✉ fenererkam@gmail.com ☎ +49 1573 9659088 in fatihcorumluoglu

Professional Summary

Driven cybersecurity specialist and Junior Penetration Tester with an **eJPT certification** and an academic background in Electrical and Electronics Engineering. Specializing in offensive security with deep practical knowledge in network enumeration, vulnerability exploitation (**OWASP Top 10**), privilege escalation, and Active Directory attacks. Proven track record across 1,000+ hours in hands-on lab environments, CTF challenges (**Top 1% on TryHackMe**), and bug bounty programs. Proficient with **Metasploit, Burp Suite, and Nmap**, as well as Python and Bash scripting to identify and remediate critical security vulnerabilities. Combines analytical engineering rigor with structured methodologies aligned with the Cyber Kill Chain.

Selected Certifications & Achievements

- **eJPT** (eLearnSecurity Junior Penetration Tester)
- **TryHackMe: Top 1% Globally**
- **CompTIA Security+**
- **ISO 27001:2022 Lead Auditor** (Accredited Training & Exam Certificate)
- ISC2 Certified in Cybersecurity
- IBM Cybersecurity Analyst Professional

Experience & Professional Development

Cybersecurity Home Lab & CTF Practice

- **1,000+ hours of documented hands-on experience** across home labs, bug bounties, and CTF challenges, focusing on web application exploitation (OWASP Top 10), network penetration testing, Active Directory attacks, and Linux/Windows privilege escalation.
- Developed and validated custom exploits and payloads across various simulated targets.

Remote
Jan. 2024 – Present

Cybersecurity Training Program | TechPro Education

- Conducted systematic network discovery and service enumeration using **Nmap** and the Nmap Scripting Engine (NSE) to map attack surfaces.
- Identified and exploited **OWASP Top 10** vulnerabilities (SQLi, XSS, IDOR/BOLA) in web applications using **Burp Suite**.
- Executed target exploitation and system compromises using **Metasploit**, generating custom reverse-shell payloads via **Msfvenom**.
- Performed credential attacks on network services (SSH, FTP, RDP) using **Hydra**, along with offline password cracking via **Hashcat** and **John the Ripper**.
- Enumerated domain structures and Active Directory configurations using **SMBMap**, **CrackMapExec**, and **Enum4Linux** to discover lateral movement vectors.

Remote
May 2023 – Dec. 2023

Technical Quality Assurance Freelancer | Outlier AI / Mercor

- Evaluated state-of-the-art AI models via Reinforcement Learning from Human Feedback (RLHF), emphasizing logical consistency and technical accuracy.
- Maintained training data integrity and ensured adherence to complex project guidelines.

Remote
Oct. 2024 – Present

Education

- M.Sc. Christian-Albrechts-Universität zu Kiel**, Electrical Engineering and Information Technology
Focus: Information Technology. Includes 4 "free semesters" due to COVID-19 special regulations. Currently pivoting toward practical cybersecurity due to the high theoretical content in the current curriculum. Sept 2021 – Present
- B.Sc. Karabük University**, Electrical and Electronics Engineering (Recognized Degree)
GPA: 2.2 (German grading scale)
Bachelor's Thesis: Computer-vision-based automation system for object sorting. Sept. 2014 – May 2019

Skills

Offensive Security: Metasploit, Burp Suite, Nmap, Hydra, Hashcat, John the Ripper, SMBMap, CrackMapExec, Enum4Linux, WPScan, Searchsploit, Msfvenom.

Networking & System Administration: TCP/IP, Linux/Unix CLI, Bash & Python Scripting, Wireshark, Active Directory Enumeration, SQL.

Compliance & GRC: ISO 27001 Framework (Lead Auditor Qualification).

Languages: German (B2/C1), English (C1/C2), Turkish (Native).

Projects

- **Damn Vulnerable MCP Server - Enhancements**
- **Thesis: PLC-Based Object Sorting with Computer Vision**
- **From LLMs to AI Agents**
- **Language Learning Game**
- **Polarization in Communication Channels**
- **Home Automation System (Smart Home)**
- **SMS-Controlled LED System**
